

Welcome to the International Medical Admission Test **(IMAT)**

The International Medical Admissions Test (IMAT) is a subject-specific admissions test in English, designed by Cambridge Assessment, for applicants to Medicine and Surgery courses at Italian International Medical Schools.

These courses are taught in English, with places open to both home and international students. Cambridge Assessment works in conjunction with the Italian Ministry of Higher Education and Research (MIUR) to develop and deliver IMAT, which is the English language equivalent of the Italian admissions test used for entry to medical degrees taught in Italian.
